

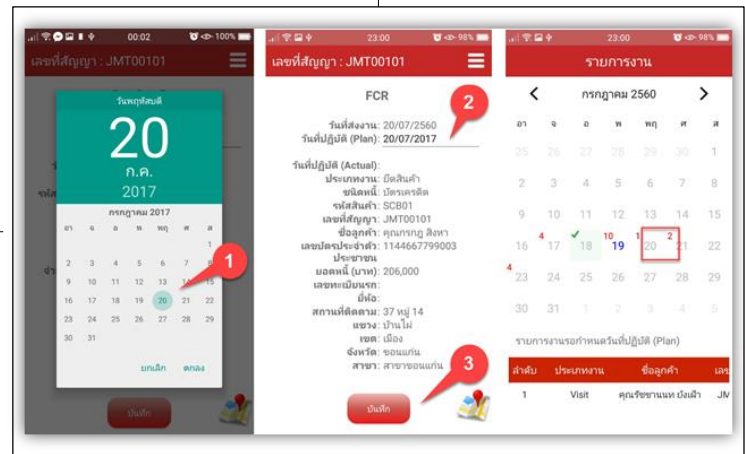

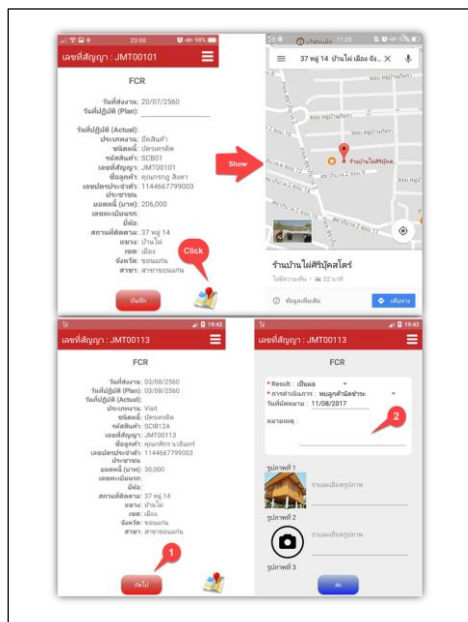

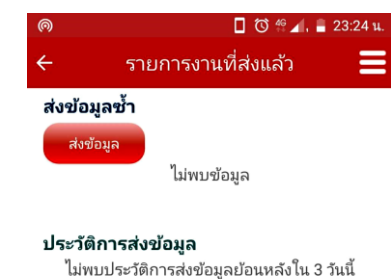

Figure 1 illustrates the mobile application interfaces for data collection. The figure is divided into three panels:

- Left Panel:** Shows the 'Mobile Survey System Test' login screen. It includes a logo for 'jmt network services', a version number '1.10.3', and a red button labeled 'เข้าสู่ระบบ' (Login).
- Middle Panel:** Shows a 'รายการงานประจำวัน' (Daily Work Report) screen. It displays a table of survey data with columns: ลำดับ (Order), ประเภทงาน (Work Type), ชื่อลูกค้า (Customer Name), เลขที่สัญญา (Contract Number), รหัสสินค้า (Product Code), and ยอดหนี้ (Debt Total). The table lists 7 items, including visits and debt collection activities.
- Right Panel:** Shows a calendar view for 'กรกฎาคม 2560' (July 2017). It highlights the date '20/07/2560' and provides a detailed view of the survey results for that date, including the contract number 'JMT00101' and a list of survey results.

The figure consists of two side-by-side screenshots of a mobile application interface. The left screenshot shows the original version of the application, which has a red header bar with the text 'รายการงานประจำวันนี้' (Today's Work List) and a large, empty white area below it. The right screenshot shows the modified version of the application. It also has a red header bar with the same text. Below the header, there is a calendar view showing the month of October. A red box highlights the title 'รายการงานประจำวันนี้' in the modified version. Below the calendar, there is a list of tasks with the title 'รายการงานที่กำหนดวันที่ปฏิบัติ (Plan)' (Work List by Date of Practice (Plan)). The tasks are listed in a table format with columns for date, time, and task description. The modified version also includes a 'ไม่พบข้อมูล' (No data found) message at the bottom.
